

First in Japan! Refreshing drive to San'in Coast Geopark area with **GEOCOMS**, an ultra-small electric vehicle for tourism

GEOCOMS is an unprecedented sightseeing service that you can enjoy with an ultra-small electric vehicle, a new “tool”, mainly in Iwami Town, which is a part of the San'in Coast Geopark, certified as a UNESCO Global Geopark, and has many hidden charms.

“GEOCOMS” incorporates elements of activities and sightseeing tours utilizing the clean and compact ultra-small electric vehicle.

Model course(Tottori Sand Dunes Station)

<1-hour use>

You can enjoy driving along the coast and visiting such sites as an observatory with a view of the Tottori Sand Dunes and “Tanegaike Pond,” which is famous for a legend about a snake.

<3-hour use>

You can enjoy “Uradome Beach,” which is popular for its wild landscape of precipitous cliffs, caves and oddly shaped rocks formed by the powerful waves of

Model course(Iwami Station)

We have several model courses according to the participant’s preference. The audio guidance system will provide you with course navigation and tourist information.

1. Scenic Geopark course (3 hours or 1 hour)

Uradome coast has many notable marine erosive features formed by the powerful waves of the Sea of Japan. This is the most popular course in which you drive along the coastal road that leads to Higashihama Station while enjoying the beautiful, constantly changing scenery such as cave entrances, caves, and white sandy beaches.

2. Welcome to the Anime world course

Iwami Town in Tottori Prefecture is the location of a TV anime and attracts many anime fans. In recent years, we have come to see these fans dressed in cosplay costumes getting around the town by rental cycle.

In this course, with GEOCOMS, you will visit recommended locations around the town on which the anime is based.

Characteristics of GEOCOMS

Characteristic 1: A refreshing feeling like riding a go-kart

Hold the steering wheel and see the tourist sites with a cute electric vehicle

You can get in the open COMS and feel the sea breeze and hear the sound of the waves.

The maximum speed is 60 km/h. You can hold the steering wheel and drive while enjoying the beautiful scenery to the fullest, being a part of nature.

A cool and warm cushion is provided on the vehicle seat, so you can drive 'cool' in summer and 'warm' in winter.

Characteristic 2: Drive easily with a compact vehicle

Anxiety-free driving on narrow streets only the locals know

You can easily drive along narrow streets with the compact vehicle. Furthermore, extra torque is applied for Iwami Town because it has many slopes. You can go through narrow streets and up slopes easily and enjoy a spectacular visit without stress. As the seat heater is installed, you are not going to shiver when the weather is cold.

You can drive about 60km on a single charge. You can travel around many places without worrying about charging the vehicle.

Characteristic 3: Take photogenic photos to post on SNS!

Traveling with vehicles unique to this area

Vehicles covered in cute sea creatures found in the San'in area such as crabs, sharks, squid, and rock fish. Some people drive differently to usual, dressed in cosplay costumes.

We also offer a service that allows you to drive in your swimwear so that you can enjoy swimming at the beach, which is the charm of Iwami Town in summer

Charge

3 hours: 3,000 yen 1 hour: 2,000 yen

*To use GEOCOMS, a valid international driver's license is required in Japan.

Booking

Please make an appointment in advance online or over the telephone.

Business Operating Entity: The Association for Tottori Tourism Mobility

Six parties, namely Tottori Prefecture, Iwami Town, Chizu-Sekiyu Co., Ltd, TOYOTA AUTO BODY Co., Ltd, JTB Corp., and Forte Co., Ltd, entered into an agreement and established “The Association for Tottori Tourism Mobility”.

As a proof of concept project utilizing each partner's strength, we launched “GEOCOMS”, a new tourism project for low-carbon mobility, in April 2018.
